

BANNERBOW MODULAR SYSTEM

HOW IT WORKS – STEP BY STEP

The Bannerbow Modular System gives you flexibility, creativity, and sustainability in one smart package. Build, adapt, and reuse your setup for every occasion – without having to invest in entirely new products. But how does it work?

1 CHOOSE YOUR STARTER KIT

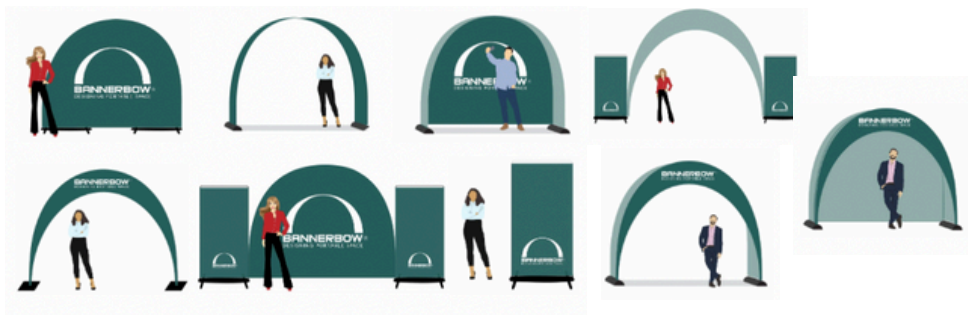

Start by choosing the size that best suits your needs – Small or Large. Each kit includes the full modular system and allows you to build up to 9 unique configurations.

Start small and scale up – and save money by choosing a Starter Kit. You can always begin with a single component and add more parts later.

2 CHOOSE YOUR MODULS

Choose an arch, backdrop, flag – or combine multiple elements to create a larger setup.

Continue on the next page

3 INDOOR OR OUTDOOR EVENT?

If the system is going to be used outdoors, it's important to order the correct accessories designed for outdoor use. The products are also equipped with loops so you can attach guy lines for extra stability.

4 ORDER YOUR PRINTED GRAPHICS

Once you've chosen the structure of your modular system, simply order the printed products needed for your specific event.

SMALL SYSTEM

Max height 2.4 meters, adjustable width between 1 and 5 meters – ideal for venues with height restrictions.

LARGE SYSTEM

Max height 3.2 meters, adjustable width between 1 and 6 meters – perfect for large, open spaces.

THE STARTER KIT: BUILD AND COMBINE DIFFERENT MODULES

Base plates, adapters, and sectioned aluminum rods connected with flexible bands – for easy assembly and compact storage.

Choose your parts separately – whether you want an arch, a backdrop*, a flag, or a complete display solution.

**There is no backdrop that fits the large Starter Kit.*

READY TO GET STARTED?

With our modular system, you get a long-term, professional solution that grows with your needs. Whether you want to begin with a complete Starter Kit or build your system step by step, you have the freedom to create a visual experience that stands out!
